Hello Ed

I left you a phone message to see if you could give me or mark a call about the initial inspection.

Thank you  
Brian Harden

Hi Brian:

Thanks for the notification. Just so I understand clearly:

This is notification of the initial inspection for the in-mine System Activation in accordance with Paragraph 29.d(1). Is that correct? The duration of the test should be 24 hours or more. Would it possible for me to get a tour of the system sometime on Tuesday (may 7:00 a.m. if I can do it and get out so I can attend another meeting at 9:30 or following that meeting?

Please advise if that works for you guys. If not, if others times would be better. Basically, I need the compliance inspection will need to display that the system performs as intended (divert flows to the mine pool, prevents flows from flowing out KT, that flows of all magnitude could be diverted, storage, instructions, materials, etc. as per Paragraph 29.

Thanks much, maybe we can just talk on Monday,

Ed

**Subject:** Diversion dam system practice notification for Barney and Kellogg Tunnel portal

Good afternoon Ed

I wanted to inform you as per our agreement of work scheduled to be performed by our company in the Barney and Kellogg Tunnel portal.

We are scheduling a contingency diversion dam construction practice session on Tuesday July 24 2018 at 7:00 a.m.

If you have any questions or concerns please let me know.

Thank you

Brian Harden
